SPECIAL VOLUME (PART 2) TO MARK THE CENTENNIAL OF JULIUS PETERSEN'S 'DIE THEORIE DER REGULÄREN GRAPHS'

Guest Editors: Lars Døvling Andersen
Jørgen Bang-Jensen
Tommy R. Jensen
Leif Kjær Jørgensen
Gert Sabidussi
Carsten Thomassen
Bjarne Toft
Preben Dahl Vestergaard

CONTENTS

K. Cameron and J. Edmonds
Coflow polyhedra 1

P. Erdős, R.J. Faudree and C.C. Rousseau
Extremal problems involving vertices and edges on odd cycles 23

H. Fleischner
Spanning eulerian subgraphs, the Splitting Lemma, and Petersen's Theorem 33

H. Fleischner and M. Stiebitz
A solution to a colouring problem of P. Erdős 39

A. Frank
On a theorem of Mader 49

Z. Füredi
Indecomposable regular graphs and hypergraphs 59

J.R. Griggs and J.P. Hutchinson
On the r-domination number of a graph 65

H. Gropp
Enumeration of regular graphs 100 years ago 73

E. Győri and M.D. Plummer
The Cartesian product of a k-extendable and an l-extendable graph is $(k + l + 1)$-extendable 87

R. Halin
Some finiteness results concerning separation in graphs 97

D. Hanson
A quick proof that $K_{10} \neq P + P + P$ 107

D. Hanson, P. Wang and L.K. Jørgensen
On cages with given degree sets 109

R.L. Hemminger and X. Yu
On 3-connected graphs with contractible edge covers of size k 115

A.J.W. Hilton and Z. Cheng
The chromatic index of a graph whose core has maximum degree two 135

F. Jaeger
A new invariant of plane bipartite cubic graphs 149

H.A. Kierstead and W.T. Trotter
Colorful induced subgraphs 165

W. Kocay
An extension of the multi-path algorithm for finding hamilton cycles 171

A.V. Kostochka
List edge chromatic number of graphs with large girth 189

D.D.-F. Liu
T-colorings of graphs 203

J. Mayer
Conjecture de Hadwiger: $k = 6$. II—Réductions de sommets de degré 6 dans les graphes 6-chromatiques contraction-critiques 213

J. Nešetřil and V. Rödl
On Ramsey graphs without bipartite subgraphs 223

K.B. Reid and W. Gu
Plurality preference digraphs realized by trees, II: On realization numbers 231

G. Sabidussi
Binary invariants and orientations of graphs 251

H. Sachs
How to calculate the number of perfect matchings in finite sections of certain infinite plane graphs 279

A. Saito
Cycles of length 2 modulo 3 in graphs 285

K. Seyffarth
Hajós' conjecture and small cycle double covers of planar graphs 291

M. Stiebitz
On Hadwiger's number—A problem of the Nordhaus–Gaddum type 307

H.J. Veldman
Cycles containing many vertices of large degree 319

D.R. Woodall
An inequality for chromatic polynomials 327

D.R. Woodall
A zero-free interval for chromatic polynomials 333

D.A. Youngs
Gallai's problem on Dirac's construction 343

J. Bang-Jensen and B. Toft
Unsolved problems presented at the Julius Petersen Graph Theory Conference 351

P. Hein
The road to wisdom? 361

Author index to volume 101 363
